Site Definition for MyPHPSite

Basic Advanced

## Site Definition

Editing Files Testing Files Sharing Files

A site, in Macromedia Dreamweaver, is a collection of files and folders that corresponds to a website on a server.

What would you like to name your site?

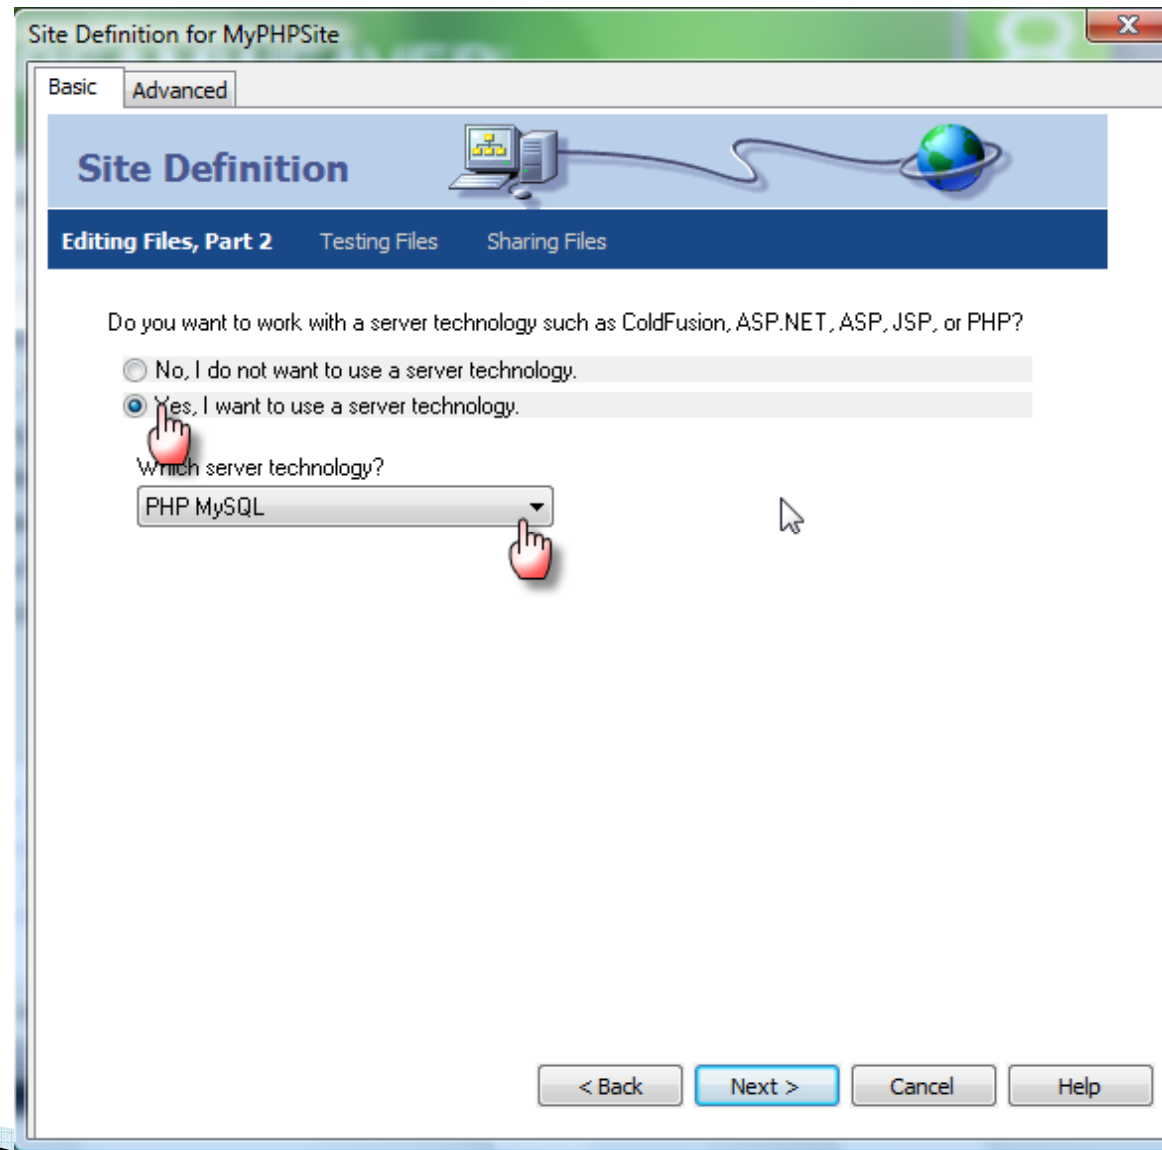

Example: mySite

What is the HTTP Address (URL) of your site?

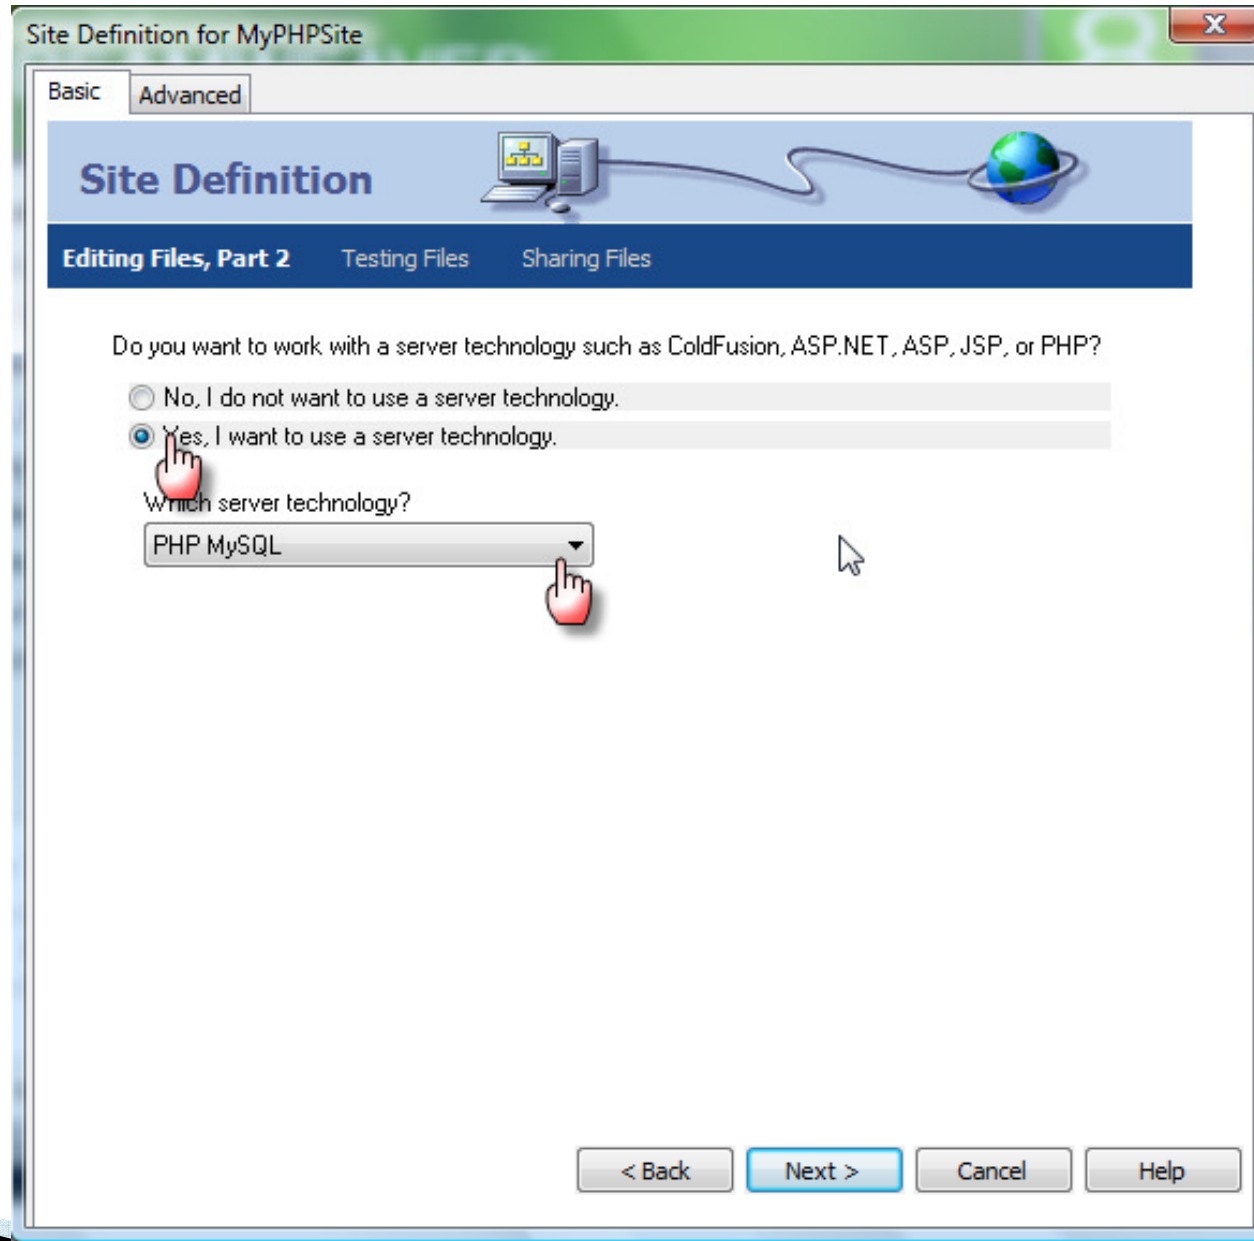

Example: <http://www.myHost.com/mySite>

If you want to work directly on the server using FTP or RDS, you should [create an FTP or RDS server connection](#). Working directly on the server does not allow you to perform sitewide operations like link checking or site reports.
